

SATELLITE DISH INSTALLATION

Tenant must obtain permission from owner, landlord and/or HOA to install a satellite dish.

Dish equipment is to be a qualified satellite receiver and must be installed by a professional dish network company. No cables or wires leading to or from the receiver may be placed on the outside of the building or to be visible from common view.

Tenant shall keep the qualified satellite receiver in good repair and maintenance and not permit the dish equipment to become unsightly.

Tenant agrees to remove and dispose of the dish at move-out and will be responsible for any costs incurred for any damages caused to the property from the installation and/or removal of equipment.
